Q: How to send multiple chat messages at once in laravel? I want to send multiple messages at once in Laravel framework, but I don't know how to do that. My code is: 'testing', 'user_id' => 1, 'user_id' => 2];

```
$this->dispatch( 'Chat.postMessage', $postmessage, null, 'user.id' ); // get all users messages $getmessages = \App\Http\Controllers\Chat\ChatController::getMessages(); // users messages messages of first user $getmessages = \App\Http\Controllers\Chat\ChatController::getMessages($userid = 1); $users = $getmessages->getMessages(); ?>
```

How can I send a post message to a group of users at once? A: You can use Illuminate\Support\Facades\Mail facade to send emails

```
sendMultipleMessages() Sends the given email to the given recipients. mail() Sends an email 2d92ce491b
```
