Value comes directly from servlet, for request parameter. If you need to get data from form, you can write your own form handler class. 'use strict'; var callBound = require('..helpers/callBound'); var \$assign = callBound('Object.assign'); var ES = require('..es'); module.exports = function (t, a) { a(t.call(ES.Number, ES.Number), ES.Number, "NaN"); a(t(1), 1, "1"); a(t(2.3), 2.3, "2.3");
