Add MathType 7 Crack to your Microsoft Office. We are specialized in customizing. In that case, you can download MathType 7 Crack free. 3.4.1.2.5 | 19/05/2020 | 35 MB. MathType MathType is a powerful Math application for Windows. It helps to create mathematical notation for internet. The present invention relates to a pressure sensitive adhesive sheet. More particularly, the present invention relates to a pressure sensitive adhesive sheet wherein the pressure sensitive adhesive layer is colored in an appropriate manner, and the colored portion of the pressure sensitive adhesive layer is not likely to cause blocking to an adhesive tape using the pressure sensitive adhesive sheet. Pressure sensitive adhesive tapes are widely used in various kinds of articles, such as disposable diapers, sanitary napkins, and underpads. Pressure sensitive adhesive tapes are required to be soft, have good heat sealability, and be resistant to the creep of the adhesive layer even under the stress caused by peel-off of the tape. These tapes are usually formed into rolls, and attached to the tape-use articles. In this case, some tapes are used in a state that the adhesive layer is exposed to the side surface of a release liner, which is stuck to a portion of a back surface of the adhesive layer. It is also used to affix the pressure sensitive adhesive tape to a pressure sensitive adhesive-coated article or to a reinforcing material for the pressure sensitive adhesive-coated article, or to affix the pressure sensitive adhesive tape to another tape, such as a tape to be used for holding a package thereon, or a packaging tape. In order to color the pressure sensitive adhesive layer, a colored pressure sensitive adhesive layer is laminated on the pressure sensitive adhesive layer. As for a colored pressure sensitive adhesive layer, Japanese Unexamined Patent Publication (Kokai) No. 63-226129 proposes a pressure sensitive adhesive sheet which comprises an adhesive layer containing a colorant, and a paper support layer, on which the adhesive layer is adhered. Japanese Unexamined Patent Publication (Kokai) No. 6-126923 proposes a pressure sensitive adhesive tape which comprises a non-woven fabric base, a pressure sensitive adhesive layer, and a reinforcing material. This pressure sensitive adhesive tape has a colored portion for enabling the base of the tape to be easily identified. The colored portion is formed in the pressure sensitive adhesive layer on the surface of the non-woven fabric base. Japanese 2d92ce491b
