Mar 11, 2010 Daniel Smith of York Media told AVN that Opticodec-PC is focused on doing business with the "big operators", which he said "leads to good (feedback)." Opticodec-PC Streaming Encoder LE V2.1.16; Saburell Sept 26, 2018 Opticodec, a Swiss company that specializes in RTSP players, has released a Windows-based client that has all the functionality of a full-blown streaming video player, for only \$49.95. Corporate history Erik Heilig (founder of Opticodec), has been working at the same time in video streaming and high-definition movies. He has been building technologies since 1998 that eventually led to the development of optocodec. He was also involved with numerous startups and companies related to the mass market technologies in personal communication tools. He created two popular interactive web sites in the multimedia industry, see List of web-based multimedia websites, and developed several software products.

Timeline External links References Category:Free media players Category:Windows media players Category:Video on demand streaming services Category:Software companies of Switzerland Category:Swiss brands Category:Companies established in 1998Q: What is the difference between "\$-f" and "--force" I'm using some backup programs and I was wondering what the difference was between using "\$-f" and "--force" when using the cp command. What if I have a file named "tmp.php" in my home directory that I've renamed to "tmp.txt" using "\$-f"? A: First "\$-f" is a feature of Bash shell, see Bash man page. In particular, if I recall well, "\$-f" is a "magic" variable which contains the full pathname of the standard input if the command is executed interactively and there are unmatched file names in the argument list; it is set (and expanded) before "\$@". The --force option is a GNU/Linux special option which forces the removal of an object even if it is currently opened (so you can write on it), or even locked by an other process. It is a GNU/Linux command and the option is not really present in other systems (not in BSD's cp either, ba244e880a
