Category:Windows software Category:Windows-only software Category:Video game cheatingQ: Cannot access members of C++ class from Java I have a C++ class with a lot of members and I am trying to instantiate it in a way that the members can be accessed from Java. I am doing this; C++ code: class Class { public: Class(int id) { mId = id; } int getId() { return mId; } int getObj2() { return mObj2; } private: int mId; int mObj2; }; JNI: Java Class: public class MyClass { public static native Class makeClass(); static { System.loadLibrary("myClass"); } } And now I am trying to instantiate the class in Java: MyClass.makeClass(); I have verified that the c++ class is properly loaded into the JVM but I do not see any member variables of the class being loaded. Am I doing something wrong here? A: Adding the following code solved the issue: JNI: public class MyClass { public static native Class makeClass(); static { System.loadLibrary("myClass"); } } C++ code: Class makeClass() { Class newClass(19); return newClass; } And then calling it in Java: MyClass.makeClass(); A district attorney from Pennsylvania said that he believes that Rep. Ilhan Omar (D-MN) may have committed domestic violence after her husband was accused of assault. Mark Lazarus, the acting district attorney for Philadelphia, made the comment on "Fox & Friends" on Friday, regarding the recent accusation Omar's husband, Ahmed Hirsi, made against her following reports of a fight on their honeymoon. "I certainly think that I would 3ef4e8ef8d
