European Touring Car Cup The 2012 FIA European Touring Car Cup
was the third season of the FIA European Touring Car Cup, an
international sports car championship organised by the International
Motorcycling Federation since 2006. It was the third season to be run
as a support category to the World Touring Car Championship. The
2012 season was the first season to be run under the new regulations of
the new TCR regulations for touring cars. The sport now features six
different classes: Super 2000, Super 2000 Tech, Euro 2, Euro 3, Euro 4
and Euro 5. The championship sees the return of the saloon cars,
alongside the touring cars and also the international class, which
features GT and N/GT cars. Driver changes Teams and drivers Drivers
from Germany, Hungary, Italy, Portugal and Spain were eligible to
enter the championship. There was no official support programme for
the category in 2013, but as it was announced to be part of the WEC,
there will be some differences between the WEC and ETCC. Race
calendar and results The 2012 season was announced to be a 13-round
series, supported by the WTCC, finishing on 11 October at the 2012
World Touring Car Championship's Race of Hungaroring.

Category:Futuremark[Succinic dehydrogenase activity in the rat brain
cortex after chronic and acute lead administration]. A study was made
of the enzyme succinic dehydrogenase activity in the rat brain cortex in
response to chronic and acute lead intoxication. The study showed an
increase in the succinic dehydrogenase activity in the rat brain cortex
after lead exposure. The increase was mainly due to the increase in the
"resting" component, and it was accompanied by the compensatory
mechanisms activation. At the same time, the activity of the enzyme in
the "active" component increased and remained unchanged. Circulating
immune complexes and cryoglobulins in liver diseases: significance and

limitation of their studies. Circulating immune complexes (CIC) and cryoglobulins are very important markers of immune activation in patients with liver diseases. Therefore, CIC and cryoglobul
