Stenographer Grade – IV No of Vacancies: 02 Age Limit: 30 years Educational Qualification: Hindi or Malayalam

Important Dates: Starting Date to Apply for this Post: 17 May 2017 to 06 June 2017

This disclosure relates to the processing of video data and, more particularly, to methods and systems for the encoding and decoding of video data in formats that can be processed on non-PC systems. The popularity of digital video, such as home video from digital video cameras and DVDs, has resulted in an increased demand for video storage and transmission. In addition, the ability to store large amounts of digital video on a personal computer (PC) and transfer that video over a computer network has increased the demand for video distribution over computer networks, such as the Internet. To store and distribute video data, most video data is stored in digital form, using a digital video format that is adapted to the way the video data is processed. For example, most digital video data is stored in a format known as Moving Picture Experts Group (MPEG)-1 format, also known as MPEG-1 Part 1. MPEG-1 format is a compressed digital video format that is based on the Motion

Picture Experts Group (MPEG) standard for the compression and multiplexing of video data. MPEG-1 format is a combination of video and audio data, both of which are compressed using the MPEG standard. MPEG-1 video includes three types of pictures: intra-coded pictures (I-frames), forward predictive pictures (P-frames), and bi-directional predictive pictures (B-frames). I-frames and P-frames can be used to form MPEG-1 video. In the case of P-frames, the preceding I-frame is used as the reference for forward prediction of the P-frame. In the case of B-frames, the preceding I-frame or P-

Hilton's agent, Jeff Roloff, confirmed to EW that the actress died at her home in Los Angeles on Thursday. Her death is being treated as a medical condition. Hilton played the roles of Tanya, the Companion of Commander Chakotay, on Voyager, and first officer Nancy Piller in the two-part pilot episode of Enterprise. She also played the role of the Terok captain's wife in the 1996 episode "Resolutions." Hilton appeared on-screen with Trek alums including Marina Sirtis, Gates McFadden and Robert Beltran, who played a copilot in "Parallels." Roloff said that Hilton's death had been in the works for the last week and a half. "It's going to be a sad time for her family," Roloff said. "She was a very strong woman who had been battling this for a long time." Voyager was the first Trek series to have a woman as its captain, at the request of the network. Star Trek: Voyager star Kate Mulgrew posted a tribute to Hilton on Facebook on Thursday: Unbelievably sad news. Our co-star Marci Hilton died today in LA. She was a fantastic and brilliant actress. So skilled in so many areas of theatre and film. Please send our

thoughts to her husband and family. Sex differences in reading and spelling in a large sample of students: Implications for basic cognitive science and for work on literacy. Past research has shown that there are sex differences in reading and spelling abilities among young school-age children. However, a considerable amount of variation exists in the estimates of these effects. Therefore, the present study, based on a large sample of students, addressed the issue of sex differences in reading and spelling abilities 2d92ce491b
