I tried something like this: `#!/usr/bin/env bash while read line; do echo $line done` Q: What is the sdk path of 'Android M' in Android Studio? I am using Android Studio and I can't find the sdk path of 'Android M'. I have checked and find the 'Android M' package can be found in the 'Android SDK' package. Is there a sdk path of 'Android M' or is there any other way to set the sdk path of 'Android M'? A: By default, Android Studio uses the SDK that is inside the path that was specified in the `sdk.properties` file. In that case, that would be: `C:\Users\YourUserName\AppData\Local\Android\Sdk\platform-tools` Replace `YourUserName` with your username. The City and County of San Francisco declared a public health emergency over the coronavirus Tuesday, March 3, 2020, the first time a local government has announced such a move during the pandemic. The public health emergency was declared under the law passed by the legislature during the last budget process. The declaration expands the powers of the city's public health director, who can now use city resources to "ensure safe access" to the community, and directs the public health director to "take such other measures as may be necessary to prevent the introduction or spread of the virus in the city." The public health emergency could be lifted or extended at any time by 2d92ce491b
