I am using HP Pavilion dv7 2122ca. Ralink RT3290 802.11bgn Wi-Fi Adapter not connect to 802.11 g,windows 8.1. 02-18-2014 11:37 AM - last edited on 03-27-2014 12:42 PM by Retired . Solved: i am using HP PAVILION 15-E015TX. i reset my windows 8 OS recently because of some corruption of data. after resetting the OS everything is . This is a list of wireless network adapters supported by the Linux Wireless Extensions (iwlwifi) and / or Wireless Driver for Ralink RT3290 802.11bgn Wireless Adaptor. Mar 19, 2020 I am using HP Pavilion 15-e015TX Laptop with Windows 8.1 (64-bit), I have already install the drivers and the network card is installed correctly. I want to remove these installed drivers and I have downloaded the Windows 8.1 Driver for Ralink RT3290 802.11bgn-WiFi-Adapter. I tried to install this driver but it says The system cannot find the file specified. What can I do? A: you must install the windows 8.1 driver. for windows 8.1 64 bit ralink Rt3290. there are two problems: 1- you installed the wrong driver 2- you installed the driver in 32 bit mode, so it is not running with the x64 winodw you must change the mode to 64 bit this might be the reason why you are not able to load it. if this is not the solution try this: download the driver from this link: or this link : or this link : then extract the driver to your desktop and try to load it again, if it did not work this time, you must install your system with

Ralink RT3290 802.11bgn Wi-Fi Adapter Driver for Windows 8, 8.1. Ralink RT3290 . If you need any further information, please let me know. @PCP, A little more info would be great! @Rarree Yes I am using Windows 8.1, I have an HP Pavilion 15 Laptop. Hi, I recently upgraded to Windows 8.1, and am experiencing no wi-fi connectivity. I have the RT3290 card installed with the latest Ralink driver. In the windows device manager, the card is there, but there's no devices listed in the "adapters connected to" window. It shows "Not Installed" under the "Device Manager". Any help would be great! Thanks. Check for update to this driver: "What's new in Ralink RT3290 802.11bgn Wi-Fi Adapter Driver 5.0.38.0 for Windows 8.1". Hi, I am having a problem with the above RT3290 Wireless Adapter in Windows 8.1. It keeps loosing connectivity after running about an hour. My software is Windows 8.1 Ultimate x64. Ethernet can be detected and it does show all the essid's on my network. No iwconfig output shows that any new SSIDs have been found. If I reboot and it happens again, it will stay connected for a couple hours and then it will disconnect again. I have tried unplugging the power for a couple of minutes to restart the adapter and no change. If you are looking for something to do over the Christmas holiday period, the free games section of the Windows Store has loads of fun, beautiful titles to keep you entertained. Microsoft stated the most recent version of the driver software available for Windows 8.1 is version 5.0.33.0. This driver was released on September 22, 2d92ce491b
