I have looked in the documentation for 'asp' but can't see anything. A: I think that there is no way to achieve that. But you can make the selection to happen asynchronously, so you don't have to wait for the response of the server: protected void DropDownList1\_SelectedIndexChanged(object sender, EventArgs e) { DropDownList ddl = sender as DropDownList;

Keymaker-CORE Yamicsoft WinXP Manager v6.0 Incl Keymaker-CORE provides a feature called 'Inbuilt "XP-keymaker"', which works by "capturing" an existing (real) Windows XP key from within an XP installation, and then allowing you to export that captured key as a means to activate Windows XP; this feature is the equivalent of the one that was provided as part of the original XP activation keys (as described above). The following table lists the pre-requisite version of the software. Download Yamicsoft.WinXP.Manager.v6.0.4.WinXP.Incl.Keymaker-CORE.rar (around 10.9 MB), 511, 999.
