----- The program is implemented in C and uses WinSock. The program was designed for debugging. When debugging, the terminal will by default write debugging output to a window or stream. You can turn off this debugging by passing the flag -d. Features: ----- The terminal has a simple chat-like interface. When a user types a command and then hits enter, the terminal will check for a new command, execute it and then print a new prompt. If no command was found, a newline is printed. If a command was found, but nothing is typed after the command, the terminal will exit. The user can kill the terminal using ctrl+c. Dependencies: ----- [SO_PATH] - Library for obtaining serial port information Changelog: ----- The program has been completely rewritten and refactored in January 2019. Versions: ----- The first version was released under the MIT license in 2007. Licensing: ----- We are using the MIT license for this program. Owners: ----- The original author is Sven-Lars K. Olsen (olsen@cs.uit.no). Credits: ----- The entire code was re-written by and for Sven-Lars K. Olsen in January 2019, an MHC-class I restricted TCR, whereas the DAP-specific TCR was not. We also found that the TCR α chain in the DAP-specific T cells is preferentially expressed in the thymus, whereas the TCR α chain in the MHC-class I restricted TCR is preferentially expressed in the periphery, presumably reflecting the reduced activity in the periphery. In conclusion, the interleukin-2-dependent DAP-specific TCR is predominantly expressed in the thymus, suggesting a role in positive selection."This movie is an experimental endeavor," said Gabriela Cowperthwaite, the director of the thriller. "We were looking to push the genre in a new way." The movie is an unflinching look at the rise and the fall of a family from South Central Los Angeles, chronicling the violent events that transform three men — played by Seyfried, Shannon Murphy, and Will Poulter — into hardened criminals. "Bad Moms," which bows on Oct. 17, follows the members of the Thomas clan after
