POPSweeper Crack (Updated 2022)

POPSweeper is a popular application for cleaning POP3 mailbox. It can help you to remove spam mails from your email account and can work as an alternative to SpamAssassin. POPSweeper is the best tool for removing spam from your email account without damaging your email inbox. It is a mail filter program that scans your email through an email server and removes the unwanted mails from your inbox. POPSweeper is used as a standalone program, no need to install any other application. POPSweeper is a light weight application that can be used on all email accounts. POPSweeper is perfect for beginners and advanced users. This software offers a mail filter option to keep your inbox clean and spam-free. POPSweeper allows you to use and configure filters for specific types of mails. You can specify a message body for a certain body type like HTML, text, attachment and external link. You can also enter specific words or phrases in the phrase filter. You can filter the message from a particular sender like spam or phishing. You can also check the frequency of a message. If you have specified email address and sent a message, POPSweeper will keep a count of the message frequency. This option helps you in planning the total frequency of an email. If you wish to automate the process further, you can create a single filter rule to automatically delete messages containing specific sender, subject, body or sender-sender combinations. You can also configure a rule to delete emails containing specific words, phrases or senders. A rule is like a filter but it is different in that it can also be used as a criteria to delete mails. You can save the rules as saved rules to delete mails faster in future. POPSweeper can be used on various email accounts whether on shared hosting, cloud hosting or hosted email services. It supports almost all major email protocols. You can also configure POPSweeper to sync with your account. With POPSweeper you don't need to worry about cleaning your email account manually. POPSweeper will clean your mailbox for you. You can set your email client to keep only important emails or you can use POPSweeper to keep only important mails. One of the best benefits of using POPSweeper is that it scans for even the smallest mails. This software works like email magic and will help you to remove spam from your email. A rule is always better
