Various extra features. Additional information: Last updated: Jan. 11, 2010 License: GNU GPL version 2 Price: Free Features: Price: Free Rating: Download tinySpell+ This is a command line utility that converts old fonts to new ones, creating and/or updating a single user registry entry. (Source: [link1](#), [link2](#)) Install: RegConv is not an installer program, it does not have a Setup. It has been tested on Win32 systems and can also be run under WinPE, though it would be best to first run CheckWin32DiskFree to make sure that the system has enough space for the conversion. Download: The latest release can be downloaded from [here](#). How to use: - When the program starts up, it will check for the 'regconvext.ini' file in the current directory or, if it does not exist, it will create it. (Source: [link1](#), [link2](#)) - If it finds an old font file, it will attempt to convert it. (Source: [link1](#), [link2](#)) - If the converter is not able to find an old file, it will try to update the 'regconvext.ini' file. (Source: [link1](#), [link2](#)) - There are a number of options for the program. You can choose the font to be used (no, bitmap or True Type) or you can

---

specify the directory, name and file extension. If the directory does not already exist, it will be created. The file will be created with the name of the directory and 'regconvext.ini' will be appended to the end. (Source: link1, link2 1d6a3396d6)

Keymacro is a powerful, easy-to-use macro recorder that allows you to create custom keyboard shortcuts for your favorite applications. You can assign macros to more than 300 predefined actions such as Record Audio or Play Clipboard Audio or Set Color or... Headliner Ultimate 4.2

A small package that can produce big hits, Headliner Ultimate is a professional JAR file splitter for Windows users. With its integrated compression and conversion features, the tool can help you to quickly create JAR files from any source files (incl. MKV, MKA, MP4 and OGG). It supports batch conversion as well as the option to split multiple files at once. JAR Splitting Utility software can turn file types such as media files, software, archive files and document types into self-contained, compact JAR files (download). In addition, it allows you to add content to an existing JAR file, apply audio/video effects and output the converted files into any format. You can also set a password, set the JAR file as read-only or non-copyable. Headliner Ultimate makes it easy to create self-contained JAR files from multiple files. FEATURES:

- JAR Splitters for Windows
- Convert multiple files at once
- Advanced settings to change the compression level and file name
- Include content or replace files within the JAR
- Add password protection and set the JAR file as read-only
- Add extra folders to a JAR file
- Convert media files (incl.
