Synch file so its data can be completely synchronized from one computer or server to another. It can work with almost any data type: files, folders, images, music, or video. AJC Sync Portable supports NTFS and FAT32 and works on both Windows 2000/XP and Windows 98/Me/ NT 4.0/2000/XP. Free Download AJC Sync Portable is a powerful synchronization tool that can help users update their personal archives or just keep their currently used libraries up to date with new content. With this resource, users are free to customize most aspects of the sync process, including file exclusions. Features an interface based on ribbons This software is valuable to anyone who wants to keep folders and files up to date. It can be a highly useful resource when content is regularly updated and revisions have to be stored on disk. One can also employ it in order to create replicas of multimedia folders. AJC Sync Portable features a modern GUI that relies on ribbons in order to allow users to browse its functions. There are numerous options that can be employed in order to achieve the desired results; however, new users are guided through these features with the built-in wizard and should not have a hard time getting to grips with the basics. Allows users to adjust the process direction In order to create synchronizations between items, one must first define the source and the target folders. The program can sync any type of content, regardless of file-type or size. AJC Sync Portable is notable for its powerful customization options, which allow users to fine-tune the process to their desired needs. For example, one can adjust the sync direction (i.e. sync both ways or just from one side to the other). This is a great method of creating duplicate directories of important folders! Creating a custom process logic is also supported and can be used in order to filter source items. Users can modify the logical operator employed Valid customization options are: by modification date, size or file content. The logical operator used can also be modified (i
