E-Capsule Private Browser HD Crack +

The KeyMacro Professional edition has been developed with the highest security standards to handle all the encryption mechanisms. It supports both the SSL (Secure Sockets Layer) and TSL (Transport Layer Security) security standards. It is based on the most advanced cryptographic methods for the encryption and integrity of your data. Features include: • Extremely strong encryption and security measures • A "one password to rule them all" user interface for easier management of multiple credentials • A "One Click" Install mechanism • A powerful browser application with simple navigation and cross-browser compatibility • Firewall protection for Internet browsing security • A real-time updates module • A built-in connection status module • A "hide your IP" module • Command line interface (CLI) for a full configuration • Many other advanced features. The e-Capsule Private Browser Professional edition is an innovative, secure, encryption software and can be installed either from a CD or downloaded from www.ecapsule.com. For more information or to get a free trial version, please visit our website. Create many on-demand passwords and enable your financial data to be securely accessed anywhere, anytime, and by anyone through your computer, smart phone, iPad, or iPod touch. If lost or stolen, your financial information can't be accessed. Your financial information is protected with Advanced Encryption Standard 256-bit keys and RSA 2048-bit encryption. It is the only banking solution that stores encrypted passwords in a safe place and never shares them with a third party. No downtime. No servers to update. And no software to install. Because it's web-based, there's no software to download or install. All versions of your account information can be secured and kept secure even if you lose your computer. IT, Accounting, and Banking professionals are the primary target users of Online Access Password Manager. Our goal is to give you a complete set of business management tools that will allow you to manage your entire business with ease, security, and convenience. Login securely to your web-based Password Manager from any location, any device, and any web browser. Your password information is securely stored and secured in the cloud. Access your passwords from anywhere using Internet Explorer, Firefox, Chrome, Safari, Edge, or the latest mobile browsers. Advanced Encryption Standard 256-bit keys and RSA 2048-bit encryption. Your financial information is protected with Advanced Encryption Standard 256-bit keys and 77a5ca646e

What's New In?

Make e-Capsule Your Default Web Browser: Within the e-Capsule Private Browser product family, the HD version is specifically designed for the privacy of Internet sessions and online transactions carried out using desktops and laptops. By defining the e-Capsule Private Browser to be your PC default Internet browser you'll be able to enjoy anonymous web surfing shielded from the operating system, third parties or Trojans and spyware. Best of all, such unbeatable security and privacy is achieved without any loss in usability. In fact, the e-Capsule Private Browser is packed with state-of-the-art features and tools that will make your surfing as smooth and efficient as possible. e-Capsule Private Browser Elite Description: e-Capsule Private Browser Elite allows you to browse privately and securely your favorite websites and online applications while keeping your identity hidden by hiding your computer's physical location, disk space usage and bandwidth from the web site provider and third parties. In fact, you can access any Internet site anonymously, without leaving any traces even on the local PC where the e-Capsule Private Browser is installed. The e-Capsule Private Browser Elite is today the only encrypted zero-footprint Internet browser for anonymous Web surfing without leaving any traces also on the local PC. Access to the application is granted only after a successful authentication using strong login credentials. All the Internet session's temporary files, visited, history, cookies, passwords, form entries and even cache are kept encrypted (AES256) at all times. The IP address of the user can be hidden by routing all traffic over a network of anonymous proxy servers so that tracking and identification via traffic analysis on the content provider side is practically impossible. Uses a tab-based navigation interface, featuring export/import of favorites, download/transfer, integrated Google search and bookmarks manager. Make e-Capsule Your Default Web Browser: Within the e-Capsule Private Browser product family, the Elite version is specifically designed for the privacy of Internet sessions and online transactions carried out using desktops and laptops. By defining the e-Capsule Private Browser to be your PC default Internet browser you'll be able to enjoy anonymous web surfing shielded from the operating system, third parties or Trojans and spyware. Best of all, such unbeatable security and privacy is achieved without any loss in usability.
