What's New In TD-W8968 Easy Setup Assistant?

TD-W8968 Easy Setup Assistant is a handy application that was designed in order to provide you with a simple means of installing and configuring your router. TD-W8968 Easy Setup Assistant includes many device features such as Direct Connect, Port Forwarding, VPN, Firewall, Port Trigger, DNS, DHCP Server, QoS, UPnP, USB-Upnp, Web administration and more. It also contains a quick Wi-Fi configuration wizard. Furthermore, a built-in Setup Wizard will help you easily install and setup your Wi-Fi router for a hassle-free configuration. USB Port Triggering: You can use this feature to control some external Wi-Fi devices via a USB port on the back of your router. For instance, you can use USB port trigger to control your TV, set-top box, printers, or any other external device that has a USB port. The device to which you wish to connect to via USB port will be listed on the front page of the TD-W8968 Easy Setup Assistant. Once you select the device, the TD-W8968 Easy Setup Assistant will automatically open the configuration screen for that device. Once done, you can follow the on-screen instructions to connect the desired device to your Wi-Fi router. Powered USB: The USB port on the back of the TD-W8968 Easy Setup Assistant is USB Powered. You can use your USB powered device such as the TD-W8968 Easy Setup Assistant or other power banks, flash drives, or even pen drives to charge them. Port Triggering: You can use this feature to control some external Wi-Fi devices via a USB port on the back of your router. For instance, you can use USB port trigger to control your TV, set-top box, printers, or any other external device that has a USB port. The device to which you wish to connect to via USB port will be listed on the front page of the TD-W8968 Easy Setup Assistant. Once you select the device, the TD-W8968 Easy Setup Assistant will automatically open the configuration screen for that device. Once done, you can follow the on-screen instructions to connect the desired device to your Wi-Fi router. USB Port Triggering: You can use this feature to control some external Wi-Fi devices via a USB port on the back of your router. For instance, you can use
