If you are a fan of meeting new people, communication, and travel, you might need to move for a while. A good omen for the next two weeks is the number 27. This number represents truth, communication, travel, and trust. The 27th may bring a new challenge or opportunity if you play it well. It's an upgrade from our text editor of the year 2017, uEdit. This year, we are giving this text editor a new name, ShortCut Labs. Just like the name suggests, it's a simple text editor, yet as versatile as any other text editor available out there. Other than the name change, there's a whole lot of new features in this text editor, but first let's take a look at how it is installed and how to use it. Installing ShortCut Labs Installing this program is simple, with a simple installer. All you need to do is to run the Install.ps1 file, which will ask you to enable the developer mode on your machine. Upon doing so, you'll have a quick look at the MainPage.xaml which will prompt you to enter your Microsoft Account credentials. It will do so by checking for the app-based permission. Once it's checked, you can launch ShortCut Labs by pressing the green "Download ShortCut Labs" button. You'll be presented with a page to set your username and password, which is required to access the app. If you want to save the settings, you can check the "Remember my username and password" checkbox. Once you have entered your Microsoft Account information, you can press the "Download ShortCut Labs" button again, and the app will start downloading and installing. The entire process only takes a minute or so. Upon successful completion of the app installation, you'll get a notification that says "Successfully installed ShortCut Labs". If you want to go back to the menu, you can press the "Open ShortCut Labs" button to get back to the launcher. Opening ShortCut Labs Upon opening the app, you will be presented with an introduction, followed by a screen with the three different options available in ShortCut Labs: Explore: This option will launch the program with no selection yet. You can use the keyboard to type your search string or press Enter to pick a file. Search: This option will launch the program with your input as the search string. You can use the keyboard to type your search string or press

An HTML5 app for viewing various horoscope signs and elements. Everything in the app is rendered using WebGL. Add this app to your site: Please give us some feedback: -------------- If you're using Aptoide, AppBrain will ask you to whitelist the KlakkKar team as developers. For more info, visit: Alerts & Offers Series & Volume Iterations Get incremental value from your Adobe Creative Cloud subscription. This week's deal is for 12 issues in February 2014, for $78.76 ($8.32 per issue) – a savings of $15.25 (20% off) over the current subscription. The price is guaranteed for all digital subscriptions through the end of February 2014. You can see for yourself how the iteration feature works: In the new subscription we're having the entire year (January 2014) covered at a discount Even if you only purchased this subscription just a few days ago, you'll be eligible for the iteration discount, because all previous issues have been saved in a way that we can start generating the discount immediately. Creating and Customizing Iterations There are three ways to generate an iteration: Create a new subscription, a new iteration, or a new spinoff Under a subscription, select an issue number from the list Under an iteration, select an issue number from the list Create a new spinoff from an existing subscription or iteration In the subscription or iteration, select a new issue number from the list Select the Customize option under the Start Copying button in the subscription or iteration. In the dialog that appears, select Create a new iteration, or Create a new spinoff. The dialog will display the subscription or iteration that you're working on and the name of the spinoff. In the dialog, select Create a new iteration, and select the version number for the spinoff. Review and Complete Your Creation If you're creating a new subscription, there's an issue number on the subscription that's indicated by an asterisk (*). You can't select an issue number that's already used. If you're creating a new spinoff from an existing subscription, you can select any issue number. If you're creating a new iteration from an existing
