What's New in the?

TopoMap allows you to download topographic maps of Switzerland in the scale 1 : 25 000. The maps are made available in a comprehensive map package which includes topo-maps (for example maps of Alps, Jura, Swiss Plateau, Valais, Jura, French Alps, Swiss Prealps), satellite-imagery, relief-maps, points-of-interest (POI), etc. The maps are delivered in raster format (GEMR and GIGA) and in vector format (DXF and DWG). In the vector format the maps are stored in compressed file format (zip). The vector files can be opened with all popular CAD-softwares. General Features: 1. The application runs on both the Windows (Windows 95/98/NT/2000/ME/XP) and the MAC operating systems. 2. The application can handle multiple topographic maps in the same window. 3. Multiple topographic maps can be displayed in the same window. 4. A zooming capability allows you to select a zoom level and to scroll through the displayed

topographic maps. 5. The Map data may be navigated and may be marked, copied and pasted. 6. The map data can be organized into folders. 7. The map data can be saved in text format for later printing. 8. Various map scales are supported (1 : 10.000, 1 : 25.000, 1 : 50.000, 1 : 100.000, 1 : 200.000, 1 : 500.000, 1 : 1.000.000). 9. All fonts used on the maps are defined by the map package. 10. The maps may be rendered in the "Wireframe" or "Depth" mode. 11. The map data are displayed in two ways: the raster-maps are displayed as the normal raster-maps, whereas the vector-maps are displayed with "3D" view. The latter option is a big improvement, because you can now look around and behind the map, which is possible with a normal raster-map. 12. Raster-maps can be displayed as JPEG-images. 13. The program supports the multi-select mode for topographic maps, which allows you to select a sequence of consecutive maps. 14. The program has a database for all available topographic maps. 15. A "quick search" feature allows you to search for a map. Users can change the map-scales, the screen-scale, the map-background, the map-background-

color and the font-color. The program allows you to generate and print topo-maps. The main purpose of TopoMap is the quick and easy download of the maps. The maps may be saved in various formats. Installation: 1. Copy the program files to the
