Although this is a book we will be making available at Â£2 for the general public from the beginning of February, to support our community in particular and breastfeeding in general. The book is called "The Breastfeeding Companion" by David Knight and Linda LeGarde. Regulation of telomerase is frequently modified in human cancers and is associated with a poor prognosis in many cases. Therefore telomerase has been proposed as a marker of tumor progression. Telomerase is expressed in most tumors but telomerase activation is the final stage of malignant transformation. In this proposal, we wish to determine the mechanisms of telomerase activation in prostate cancer. Our working hypothesis is that telomerase in prostate cancer can become activated by mutation in the RNA component of telomerase. Our preliminary results show that mutations in the catalytic template region of telomerase RNA give rise to variants of telomerase with dramatically increased RNA binding and catalytic activity. We plan to determine the impact of these mutations on telomerase regulation. These studies will provide a better understanding of the molecular mechanisms underlying telomerase activation and provide a novel mechanism for telomerase activation. PUBLIC HEALTH RELEVANCE: Recent evidence indicates that telomerase might be a potential target for chemoprevention and chemotherapy of prostate cancer. However, the underlying molecular mechanism of telomerase activation is not well understood. Our preliminary studies indicate that mutations in the template region of tel
