For instance, if you accidentally delete some text and there is a copy somewhere in the same document, you can use the clone tool and copy that text, then paste it back where you want it. This is probably the most common use of the tool. The Clone Stamp can be used with most of the Pen tools. When using the Pen tool, hold the shift key and click on a point. This will create a copy of that point, ready to be pasted back into the image. The Eraser tool allows you to fill in an image with a color or pattern and then completely erase it. This is a great way to make an image look clean or to completely cover something up. The Gradient tool allows you to paint a smooth and gradual color change across an image. This is usually used to put a background or light effect on an image or to paint the edges of a photo or graphic. The Magic Eraser feature is similar to the Eraser tool. It allows you to fill an area with color and then remove it. It is a powerful tool, especially for removing unwanted pixels. The Magic Wand tool allows you to select a specific area of an image. Use this tool to pull out details in an image, blend two images together, or even make changes to the colors to bring them back to life. For instance, if you found some metal on the background of your photo but the rest of the background is the same color as the metal, you can use Curves to bring back that vibrant color.
