## KonAVio Media Free Download

The KonAVio Media Widget allows you to play any kind of media on your home webpage for free, instead of using any other generic player or plug-ins. The Media Player is so special, because it was developed for and works on any modern browser like Firefox, Safari, Internet Explorer or Google Chrome, even on desktops. In KonAVio you can add any file or stream to your webpage and define settings for the playback. All of this without having to care about the technology in detail, so you can focus on the results. The KonAVio Media Widget is optimized to use the power of QuickTime Player, RealPlayer and Windows Media Player and makes it fast and efficient in action. It is a javascript based player, so you can insert it wherever you like on a web page and do not need any coding experience. The KonAVio Media Widget uses a clean look and feel, which suits well to any website. Features of the KonAVio Media Widget: [❏ A Widget Engine](#): The KonAVio Media Widget is a perfect replacement for any embedded flash player or iframe. [❏ Support for most video and audio formats](#): The KonAVio Media Widget is able to play most video formats, such as MPEG, Real and QuickTime. [❏ Integrated Volume Control](#): To adjust the volume of the media, a dedicated volume controller is incorporated into the Widget. [❏ Customizable Tab Panel](#): You can add a tab panel to control your media playback. [❏ Optional Dynamic Slideshow](#): Present media to your audience in a slideshow of your choice and define the delay between slides. [❏ Customizable Widgetbar](#): The Widgetbar can be customized to your needs, if you want to place e.g. a playlist, navigation or player controls right into it. [❏ Optional URL Parameter](#): If you use custom parameters, you can open different url's for your media depending on the parameter. [❏ Optional Current Time](#): Display the current time of the media in the widget. [❏ Optional Playlist](#): Put media into an playlist, which plays all of the media at the same time. [❏ Optional Dynamic URLs](#): If you use dynamic url's, you can call these from the widget directly. [❏ External search by CDN](#): You can search the web for your media, so they are always available when you refresh your webpage
