The free version of AutoCAD 2012 comes with built-in technical drawing tools, including arc, box, ellipse, line, circle and polyline. .The present invention relates generally to document processing apparatus, and more particularly to apparatus and methods for error recovery in a multifunction copying and reproduction device. Multifunction devices such as laser copiers, laser printers, facsimile machines and the like are now common and commonplace. These devices are typically provided with a hard copy output to provide a final printed copy, such as an ink jet or thermal transfer printer, or a paper copy such as an ink jet printer. These devices may also be provided with an image scanner for scanning data onto image media such as paper. A common design for these devices is a stand-alone machine. In a stand-alone device, the document handler, the fixing device, the output tray, and other mechanical devices associated with the device are permanently positioned in the device during its use. However, the documents to be handled by the device may vary in size and composition, such as documents which are large, or documents which contain mixed media or graphics, or documents which have images embedded therein. Also, the documents may have different papers or media types. Thus, a device which is designed to handle single size and media type documents would not be able to handle these document types. Also, a typical document in a typical office environment is generally composed of both printed media and paper media. For example, a document may include both an image on a paper form, such as a letter or invoice, and the same image may be reproduced on a photographic paper. Furthermore, some electronic documents, such as text only documents, may be reproduced on paper print media, or may be reproduced by an image processor or by some 570a42141b
