Q: ASP.NET MVC 4 using a System.Web.UI.WebControls.CheckBoxList to append text I'm sure this has been answered before but I am having difficulties finding it, so I have to ask. I'm trying to take a CheckBoxList and convert it to a multichoice drop down. I've found some examples where users have created text boxes but I just want a CheckboxList. I cannot seem to add my list data. Using this example I can get it to show but I need to add my list data. `cblResults.DataTextField = "Title"; cblResults.DataValueField = "Id"; cblResults.DataSource = _list; cblResults.DataBind();` How can I append my list data to the checkboxes. A: Try this: `//Search for the items on your list foreach (var item in _list) { //Add a check box to your CheckBoxList using the above item's ID //as the data value and the item's name as the data text chkbox.Items.Add(new ListItem(item.Title, item.Id.ToString())); } P.S. I'm assuming your list is an IList. If it is an IList you could do this instead: //Create a blank list IList blankList = new List(); //Add the list item for each item on the list foreach (var item in _list) { blankList.Add(new ListItem(item.Title, item.Id.ToString())); } //Remove all existing items from the CheckBoxList cblResults.Items.Clear(); //Add the blank list to the checkboxlist cblResults.DataSource = blankList; cblResults.DataTextField = "Title"; cblResults.DataValueField = "Id"; cblResults.DataBind();` Q: Android, app crashing on accessing share permissions dialog For a project, I had to implement the facebook, twitter, and email logins. To achieve this I needed to
