I will be using it to sync my own compositions and to provide great sounding samples for other customers. I can hear the difference between what is played by a computer and what is played on a guitar or piano. Not only is the sound better, it also sounds very realistic. It is also easy to tweak the dynamics, tempo, etc. It took me very little time to learn this software. I can see myself getting a lot of uses from it. I hope that you sell this software. Great job. Great work! This product is really good if you are interested in using the same sounds you hear in your ears when you listen to

## What's New In Melodo VSTi?

- The main functionality provided by Melodo is the ability to listen to music that can be played on your computer speakers or headphones.
- Melodo does not play music on its own. It requires a Multitimbral Engine (see Multitimbral Engines page) to be used.
- You can import Melodo's commercial Multitimbral Engine (Balakrishnan XM), or use the free version of The Fourmilab Multitimbral Engine (SMPTE RAVEN).
- You can edit either the "Note Reference" or "Musical Note" field of a Melodo file to modify the reference note associated with each note.
- You can
