The AutoCAD drawing window includes a number of tabbed panels that appear along the top of the drawing window, as illustrated below. This makes it easy for you to view the drawing, tools,

---

and elements on the drawing. You can use tools such as the ViewCube (shown above), Object Snap, Dynamic Input, and the Cursor to navigate your drawing. You can turn each tab into its own tabbed panel, and you can add additional controls and tabs to the panel. You can switch between the panels on the fly. You can draw directly on the drawing canvas with the pencil, erase with the Eraser, and draw with the pen. You can scale, rotate, move, and delete existing drawing objects. You can load and export CAD drawings in the form of DWG or DXF files. You can work with other files and documents, such as

Thursday, June 22, 1969, the Maestro, played by Tony Curtis, is celebrating his birthday with his two sons Tony and Tony Jr. But the celebration is cut short when Tony and Tony Jr. and their father are blown up in a car bomb meant for the Maestro, who survived a similar assassination attempt in Season One. Gruccione, who wrote the script and produced the episode, spoke to The Hollywood Reporter about why the plot was ripped from the headlines in Season Two and what the Maestro is doing in Season Three. Why did the Maestro die in the second half of Season Two? In Season One, we found out why the Maestro got hit.

---

He was in a car that blew up, and he survived. In Season Two, we learn he survived that, too. Now there's a new guy in town, and they had a little bit of business in the first half of the season where they try to kill him. They were going to blow him up, and I think they were going to kill Tony, too, but then they got nervous. They pulled out at the last minute. How did they plot that assassination attempt? They were going to send somebody to the Maestro's house to give him some explosive, but then they got nervous and changed the plan. The Maestro is a show about the business of show business. How would you describe

him for audiences who might not be familiar with his story? Tony Curtis
