However, more than six million people from other parts of the world have been forced to leave their homes. A major source of tension in Bangladesh is the need for land, as the country has a population of 141 million and is growing. Half of the population is under the age of 25. They need land for grazing, farming, and living. The major form of employment is agriculture. Population statistics do not have accurate counts for these migrants, but experts estimate the country has received about 40 million migrants. These are mainly from India, Myanmar, Nepal, Bhutan, and Sri Lanka, but Bangladesh does not give a clear definition of which nation is which. They are usually treated as migrants, not as having the right to live here. A 2019 1cb139a0ed
