

nPower Software (a division of IntegrityWare) releases Power Surfacing 2.0 with support for SolidWorks 2015. This release also provides tighter integration ... Power Surfacing is an integrated development environment (IDE) for creating three-dimensional models using SolidWorks. It allows users to add new models, edit and debug models in the SolidWorks environment, and view, customize, and print results in AutoCAD. Users can easily import SolidWorks files into Power Surfacing and export models created in SolidWorks to other popular file formats including DXF, IGES, STEP, B3D, DWG, and APIS.
