p2kÂ .The role of polymorphisms in class I and II  
HLA in the pathogenesis of atopic dermatitis. An  
association between human leukocyte antigen (HLA)

---

and atopic dermatitis (AD) is thought to be due to a genetic predisposition for the disease. Using single nucleotide polymorphism (SNP) markers in the vicinity of HLA class I and II loci, we analyzed the association between HLA and AD in Japanese patients, and compared their genotypes with those of HLA-typed normal controls. A borderline significant association between AD and HLA-DRB1\*09 ( $P = 0.06$ ) was noted in AD patients. In addition, the frequencies of HLA-Cw\*07 were significantly reduced in AD patients ( $P = 0.02$ ). The significance of HLA in the pathogenesis of AD was further investigated by investigating the influence of the HLA-DRB1\*09-DRB5\*02 haplotype on HLA-DQA1\*03-DQB1\*04-DPA1\*02-DPB1\*01 phenotype in AD patients. These data may provide support for the role of HLA and its interaction with the environment in the pathogenesis of AD.

id: a3c3de8460095e55e95a079aa8c6763d5 date: 2018-10-27T20:48:13Z name: Example Name avatar: message: "Example message" git\_url: --- # Description Tags with the `example` prefix describe smaller example snippets that let you see how to

---

solve a particular use case. > **\*\*Note:\*\*** Examples should be tailored to the audience they are intended for. > For example, if you want to show how a particular feature works for a new > user, then go ahead and tag an issue with `example` on it, so they know > they can see an example of how to use it.
