Learning to read and write in a foreign language, be it for professional or personal reasons, is a challenge, to say the least. In today's fast-paced technological world, we often need to communicate with people who speak foreign languages, but we often don't know how to go about the process. We may not be familiar with the foreign language's alphabet and/or with its spelling and grammar rules. Learning to read and write in a foreign language, be it for professional or personal reasons, is a challenge, to say the least. LingvoSoft Dictionary is an invaluable tool that will help you learn and master a foreign language with a minimum amount of effort. The goal of LingvoSoft Dictionary is to help you learn a foreign language, whether it be for professional or personal reasons. What makes the LingvoSoft Dictionary different from other programs on the market is its vocabulary function, which analyzes the words that you type and provides you with a list of suggestions. The suggested list contains the same words, but they appear one after the other, like in an English-to-French dictionary. With LingvoSoft Dictionary, you can learn a new language by reading and writing, by listening and speaking, and by using your voice recognition system. The LingvoSoft Dictionary offers a wealth of additional features, including the ability to search for words and other linguistic forms. LingvoSoft Dictionary is very easy to learn and you can use it either as a stand-alone program or as a complementary tool in a Windows-based language learning program. Let's take a look at some of the features of LingvoSoft Dictionary 2007 English - Persian (Farsi).
