Easy Screen Share is a simple and efficient application designed to help you share your desktop screen with any computer in your network. Main Features: -Users on any computer can quickly connect and share their desktop screen with -private and public screens. -screen sharing is in real time with minimum delay. -To use this service you don't need to install any third-party application. -Can share screen even if the host computer is running a The first step of installing Easy Screen Share is relatively simple. The rest will just take a few simple steps. To begin Easy Screen Share will require the following: -A server -A network connection -A working modem or internet connection -Internet Explorer 5.5 or higher -An activation key if you purchased Easy Screen Share from the company website. On the server side of the project, there is no specific software needed. At this time you can choose from three server platforms. The first is Windows NT/2000, the second is OpenBSD and the third is Linux. The third option has the most support, as the applications used are very similar. Each system allows you to create your own screen. Easy Screen Share lets you create your own screens for any machine running Easy Screen Share clients. There are different control options and tools to create custom screens. Easy Screen Share Client Easy Screen Share's client application can be found on the Easy Screen Share website under the applications section. You need Windows 95/98 or higher, any version of Internet Explorer 5.0 or higher with Javascript. You can easily install the application onto your computer from within your browser. Easy Screen Share is extremely easy to use. You don't have to log-in in order to use the application. This means the application will not save any information, and you do not need to remember any log-in information. All the information is remembered using a cookie. Easy Screen Share's privacy policy states you will never lose a user's information. Any information is stored securely and never shared. Once you have access to the client, you have an option to customize your screen. You can choose to create a private screen for use by just the users on your local network, or you can create a public screen. This latter option is useful when you don't want a lot of people to see your computer screen or if you are using your computer at a public location. There are several tools available to create custom screens. You can 09e8f5149f

Screenshots Reviews Works 5 By Wabash Fantastic! Loved it 5 By Crysluz It is useful for my job, and I use it frequently. It is way faster than VNC for me as it doesn't need to redownload each time. Good software for sharing screens 5 By gwisky I like this sharing software Good Software 5 By Bestselling But it is interesting that the software doesn't show the window until you maximize it Slow download speed 2 By tdc After a good download, it takes about an hour to start sharing my screen, and even then, i can only share small screens, the bigger ones it says there is a bug and it doesn't show anything Review of easy screen share 4 By Hartsley I've used this one for quite a while, and I like it. However, there are too many features to select from and the software installer doesn't remember the selections I have already made. It works pretty well. 5 By lec17 Downloaded, installed and all works great. The best part is that it doesn't have any spyware and it is free Great features 5 By sd11121 The only issue I had was the download took forever to finish. Also, one of the screens is black, but that's because I have to set my account up to work with. good 5 By andrewbh The thing I like best is that it doesn't
