India's growth rate rose to a seven-year high of 8.2% in the April-June quarter, from 7.8% in the previous three months, the World Bank said. China's growth rate came in at 7.5%, from 6.9% a month ago. India's economy is set to pass China's in size by 2017, but not for long, according to a leading economist. The World Bank's estimates say that India's gross domestic product will be $2.6tn in 2015 and $5.6tn in 2020, overtaking the $5.1tn in the world's biggest economy. This year India will pass China to be the world's third largest economy. But in the next two years India's growth is set to slow. According to the World Bank, India's growth is likely to slow to around 7.8% in 2016 and then to around 7.2% in 2017. 'Gloomy outlook' The predictions on the growth rate of India have proved to be wrong in the past and the Asian giant's economy may yet fall short of the World Bank's projections. 80eaf3aba8

NAMI still works in this vein to ensure that everyone in the mental health field is able to provide the same quality care to individuals with mental illness as they do with other physical illnesses. History of the NAMI NAMI was formed by the merger of two important organizations in 1979. The National Mental

What's New In Trend Micro RUBotted?

Trend Micro RUBotted is a simple security monitoring program that identifies suspicious activities associated with bots, such as ZBOT/ZeuS, KOOBFACE, and WALEDAC, in order to prevent hackers and crackers from accessing your sensitive data. It can be easily installed and set up, even by users with less or no experience in such apps. After a brief setup operation, Trend Micro RUBotted creates an icon in the system tray area upon deployment, so you can click it to bring up its console. The app's GUI is based on a standard window with an uncomplicated layout. Trend Micro RUBotted automatically performs a scan job on your system for any botnet activity, but it also provides real-time protection to the computer. You can even check out log details. However, in case bots are detected, you must install a separate application called HouseCall, in order to remove them from the system, since Trend Micro RUBotted is merely a monitoring tool. One of this program's advantages is that it seamlessly integrates into the system and supports compatibility with previously installed anti-virus systems, leaving no room for software conflicts. The application is low-demanding when it comes to the computer's resources since it requires only a small amount of CPU and system memory to work properly. It has a good response time, finishes a scanning job rapidly and displays notifications whenever a malicious agent is discovered. No error dialogs have been shown in our testing and the program did not hang or crash. Thanks to its intuitive layout and overall simplicity, Trend Micro RUBotted should please the entire audience. ...check all non-critical services such as webservices, ftp, etc, and run various checks (tcp, ssl, firewall, etc) and alert me on a daily basis.
