A: You are not providing a Maven build. If you don't have it, then you have to change the packaging of your project to war. Because you have it set to jar and not war, Maven is not packaging your project as a war and as such the generated JAR is not accessible from the internet. I just re-checked your project and I had this issue when I forgot to change the packaging to war. So change it to war, delete the JAR in your local repository, then re-run Maven again. You might get the same error again. Then remove the JAR from your local repository and re-run Maven, but this time change the packaging to war. If you do that, it should work. { }wavelets for the analysis of Fourier series, [\*Journal of Mathematical Analysis and Applications\*]{ }, [\*\*330\*\*]{ }, 574–606, 2007.
