Yeh, Hsin-Hung The Animation House Yeh, Hsin-Hung is the founder of the animation studio The Animation House. The name of the studio was created by Yeh himself. He created the company after he moved from Taiwan to California in 2007. At that time, Yeh had worked as a CG artist at the studio “Industrial Light & Magic”, which was famous for the production of special effects for movies and TV series. Later on, he turned to create his own animation projects. These projects were mostly set in Europe, where Yeh attended the world-famous Royal College of Art in London. However, most of his productions were made in his studio located in the United States. Yeh created the studio from scratch. However, it soon grew to be one of the most prominent animation studios in the country. It is renowned for the production of short-to-medium animations for the educational, entertainment and advertising market. Additionally, the studio has also produced some CG elements for numerous big-budget movies. The studio is also working on several projects in parallel. This project was developed by the same studio that developed the Windows 7 Theme “Virtual Reality & Illusion”. As such, it has the same background images, but the drawings are more exotic and surreal. Moreover, Imagination Windows 7 Theme can be used to easily transform your Windows desktop into an optical illusion. This way, your Windows screen will start to change colors, shapes and images. If you have any trouble while installing or using this theme, please do not hesitate to contact us, as we will try our best to help you solve the issue. You can also give your suggestions to the developers of the theme, to make this app even better. Currently, the Windows 7 Theme “Virtual Reality & Illusion” is available for Windows XP, Windows Vista and Windows 7. The last version was released in April, 2011. However, the developers promise to maintain the support for Windows 7 and Windows 8 and will continue to release updates

All the pictures include the same two characters on a background done in shades of yellow. The color is relaxing and cheerful, aiming to improve your mood at all times. The pictures have a high resolution, which means they fit well on screens of all sizes. If you don't like any of the drawings, you can simply clear the checkbox next to the thumbnail in the Windows desktop background menu. Also, the image sequence can be randomized by simply enabling the “Shuffle” option. Additionally, the picture position can be altered. You can pick one of the available options, such as “Center”, “Tile”, “Stretch”, “Fit” and “Fill”. However, unless you have a very large screen, the images' resolution shouldn't be affected. Also, the amount of time passed before the images change can be modified to one of the preset values. These start at a minimum of ten seconds and go up to an entire day. All in all, Imagination Windows 7 Theme is an interesting addition to your desktop. Inexperienced users should have no problems in installing and customizing this app. Description: You are dreaming about relaxing stay in a quiet beach.
