1,.Forthcoming update In the long term we are going to revisit how Scheduler map is set up to avoid having to continuously run the scheduler. The map will probably be present in Power Law. Maybe in S3? We need to come up with a new architecture to make scheduling a more predictable act. We have the edge cases covered (type 0, 1) but we don't really have sensible request patterns in place, say, when you ask for two days' worth of data, how should the scheduler give you two days, or at least less than that. We have too many edges to cover, and trying to figure out the next generation of problem space is probably a good idea.// Copyright 2019 PingCAP, Inc. // // Licensed under the Apache License, Version 2.0 (the "License"); // you may not use this file except in compliance with the
