Outbreaks of Foodborne Diseases The Volusia County Health Department is investigating a series of foodborne illnesses in Volusia County. To date, nine people have been hospitalized. On May 16, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of cooked or undercooked meat at a restaurant in Ormond Beach. On May 21, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of chicken at a store in Daytona Beach. On May 22, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of raw or undercooked meat at a church in Daytona Beach. On May 23, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of raw or undercooked chicken at a restaurant in Daytona Beach. On May 23, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of raw or undercooked pork at a restaurant in Daytona Beach. On May 25, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of raw or undercooked fish at a restaurant in Daytona Beach. On May 26, the Health Department was notified by the Volusia County Division of Health that there is a cluster of foodborne illnesses in the community associated with the consumption of food items at a church in Daytona Beach. According to the Volusia County Health Department, foodborne illnesses can come in a variety of forms. The most common illness is diarrhea. Other illnesses are vomiting, stomach cramps, headaches, fever, nausea, and joint pain. The public is urged to remember that the first step in protecting themselves from foodborne illness is to wash their hands with warm, soapy water. The Volusia County Health Department is asking that anyone who experiences these symptoms should contact the Health Department immediately at 407-599-7200 or visit the Division of Health website at www.volusia.org/disease.

What's New In AutoCAD?

Drawings Retarget: Create, view, and edit drawings at high resolution, from anywhere. Share your work in any location with the Web App or the built-in File Viewer. (video: 1:24 min.) Extended Line Control: Ease drawing with a wide range of line-drawing methods, including Drawing Ruler, Drawing Guides, Dragger, and the new Shape Fillet tool. (video: 1:30 min.) New versioning and history-based collaboration features: With the new Collaborate View, view changes made by others in real time, without publishing your project. Create and share your own SharePoint Workspace, so you can see what other designers are working on. AutoCAD commands now support command history, giving you control of your own command history. So much more: New customization of block labels, add custom text and more, and see your blocks on the fly. In addition to these new features, we've made many performance and reliability improvements. We are excited about these new features and look forward to hearing your feedback. And remember, to give us your feedback, please go to: Add your thoughts about AutoCAD 2023 on the official Autodesk Community Add your thoughts about AutoCAD 2023 on the official Autodesk Community, and let others know your reactions to these new features. Autodesk will read your message, review your feedback, and share it with other Autodesk community members on social media, as well as on the Autodesk website and community blogs. Share your comments in a public forum on the Autodesk Community. See what your peers have to say about AutoCAD 2023 by checking the Discussion forum.
