Three-spotted-tabanid flies (Diptera: Tabanidae) are a group of highly species-rich, brood-attacking flies that adopt a number of mimicry regimes on a variety of host species (host switching). Most species have evolved elaborate defensive adaptations that often include highly atypical coloration and strange-looking eyes. Here, using molecular and morphological analyses of a number of tabanid species, we examine the phylogenetic basis of tabanid mimicry. We find that diversification of

tabanid mimicry is accelerated when host-switching is considered, implying that the role of mimicry in host shifting, an important aspect of the evolution of this group, has not been recognized. These results suggest that a series of convergent events, not necessarily involving the same gene-switching mechanisms, led to the evolution of an array of forms. Thousands of volunteers hit the streets to hand out food to the underprivileged and elderly in the capital on the first day of a nationwide campaign called "Somebody is Gifted Everyday", which will take place every January. More than 30,000 elderly people and the economically struggling

were given food and health services in a mass distribution on the streets of Delhi on Saturday. "Everyone is giving something. It is not a donation, it is a gesture," Anees Rehman, the president of the All India Senior Citizens League, told Al Jazeera. Hundreds of NGOs and social organisations and thousands of volunteers from all over the country participated in the distribution programme. "

Interesting article, the story is not unusual. The message is that data loss is inevitable and the best way to deal with it, is to have a backup of all your data. In my case, I lost data on old hard drives, I used to throw them away when they began to make a lot of noise, I've discovered that I've often failed to remove the disk when

changing hard disk. I do not remember what was on the hard disk before but I've found many things (photos, music, multimedia, files). I recovered a lot of pictures, I discovered many files. I have many music. I was happy and when I had time, I decided to write these messages. I am Shamsi Khan. I am working as a MCA in IIIT, Mumbai and a software developer at Navibanking.
