A menu-driven (mouse-driven) utility to replace the keyboard macro system in Microsoft Windows 95/98/NT. KMP works like any other Macro utility. It creates a menu-driven keystroke. You can also choose to enable or disable it as a Windows shortcut key, so that you can quickly apply the keystroke by pressing the hotkey. You can modify any of the Macro's parameters at any time and even add new macros. KMP can also save the macros to a file and load them at a later time. When you save the macros, KMP writes them to the file in the format that Windows 95/98/NT expects. The macros are stored in ASCII format, with each line containing a keystroke sequence, and each line delimited by a carriage return and linefeed. You can use KMP on Windows 95/98/NT without having to have any of the operating system's native Windows Macro programs installed.

**BUSMASTER Description:** As one of the fastest DOS/Windows Bus Master programs on the market, BUSMASTER is simple to install and use, and completely independent of all PC hardware. BUSMASTER has the following features:

- \* Completely integrated with Windows. BusMaster communicates directly with the hard drive controller and other PC hardware.
- \* Speed. BusMaster is three to five times faster than similar programs, because of its exclusive MS DOS BIOS execution mode.
- \* Easy to install and use. Very few complicated settings are needed to get BusMaster working.
- \* Can be used as a hot-plug device on any Windows PC.
- \* Integrates BusMaster with Windows and PC hardware. Windows software and hardware such as the keyboard and mouse are completely independent of BusMaster. You can use Windows software and hardware simultaneously.
- \* Works on all PC hardware. Almost any PC hardware, including low-end equipment, can run BusMaster. There are some exceptions, such as high-speed SCSI adapters or IDE hard drives.
- \* Integrates with Windows. You can use Windows software and hardware simultaneously with BusMaster.
- \* Works in DOS mode. BusMaster works very efficiently in MS-DOS mode. You get the best performance from BusMaster when it is used in MS-DOS mode.
- \* Very low CPU usage. BusMaster can be used with very small computer systems. No other program on the market can be run in MS-DOS mode and run as fast as BusMaster.
- \* Easy to use. BusMaster is very easy
