----- "Viking Mp3Player" is an MP3 audio player for Symbian Smartphones. Here are some key features of "Viking Mp3Player":  plays MP3 files (MPEG-1/2/2.5, ABR, VBR);  stereo playback (if phone supports it);  playlist shows all MP3 files on phone;  displays artist, title (ID3v1, v2), bitrate, frequency and mono/stereo;  displays time elapsed and the length of the track;  volume control;  easy-to-use, continuous fast-forward and rewind;  associated to.MP3 files;  full support for Bluetooth headsets. Limitations:  Unregistered version is fully functional, the full playback time is limited to 10 minutes. Viking Mp3Player is an open-source project. Permissions: ----- The app uses certain permissions. • WRITE\_EXTERNAL\_STORAGE: Allows you to move files that are stored in the phone memory to your SD card. • READ\_EXTERNAL\_STORAGE: Allows you to move files from your SD card to the phone memory. • VIEW\_SOCIAL\_NETWORKS: Allows you to see if there are any networks available. • RECORD\_AUDIO: Allows you to record the sound from your phone. • CAMERA: Allows you to access the camera and take pictures. • ACCESS\_NETWORK\_STATE: Used to check if the network is available and to access GPS if your phone has this feature. • ACCESS\_FINE\_LOCATION: Allows you to access the GPS location of the phone. • RECEIVE\_MESSAGES: Allows you to receive messages. • CHANGE\_DEVICE\_ID: Allows you to change the ID of your phone. • GET\_ACCOUNTS: Allows you to register with your Google Account. • AUDIO\_SETTINGS: Allows you to change the volume of the sound. "Viking Mp3Player" has been tested with the following models of phones: S60: Nokia E71, Nokia 7650, Nokia 5800, Nokia E61 and Nokia E62 Here are some screenshots of "V

KeyMacro is an advanced macro recorder, which can record events like: - pressing and releasing any hardware keys or keys on screen; - changing of any screen attribute (brightness, contrast); - starting and stopping phone call; - sending SMS or MMS; - sending e-mail; - recording voice; - performing any program by entering an event-condition (using Mimo program or its expression language); - programmable reminders to set alarms, set flags (using Mimo). A key should be connected to the keyboard's F1-F10 keys, if only one key is connected, the Macro will be assigned to it, and the second key becomes a modifier. The recorder will be used in the following situations: 1. To check how software reacts to key events; 2. To record custom macros for use in CIM (custom macros are saved as CIM files, a special format used by most CIM applications, including N800 software). Macros can be recorded in one of three ways: 1. Single key press: when recorded, the key will only be pressed. 2. Short interval: press-release: when recorded, the key will be pressed for a defined interval of time (recorded with "short" mode), after the key is released, it will be released immediately. 3. Long interval: press-release-release: when recorded, the key will be pressed for a defined interval of time, after the key is released, it will be released twice. The feature of using modifier keys can be used in combination with any of the three methods. KeyMacro uses the modified-key method (a key is always pressed, and after being pressed, it will be released by the recorded macro). KEYMACRO supports: - Macro recording in two different modes: "normal" and "short" (default), where the interval for recording is 2 seconds; - Macro recording in four different levels: "minimum", "normal", "maximum" and "strong", where the interval for recording is 2 seconds; - Recording of 12-key press events; - Recording of a set of keys for a specified period of time; - Recording of keys held down for a specified period of time; - Key modifiers (Ctrl, Alt, Shift, Command, Meta, and AltGr); - Keys pressed simultaneously; - Keys held down simultaneously; - Macro recording in a program: 1d6a3396d6

Viking Mp3Player is an MP3 audio player for Symbian Smartphones, supports skins, Bluetooth headsets, stereo playback. Here are some key features of "Viking Mp3Player": ☐ plays MP3 files (MPEG-1/2/2.5, ABR, VBR); ☐ stereo playback (if phone supports it); ☐ playlist shows all MP3 files on phone; ☐ displays artist, title (ID3v1, v2), bitrate, frequency and mono/stereo; ☐ displays time elapsed and the length of the track; ☐ volume control; ☐ easy-to-use, continuous fast-forward and rewind; ☐ associated to.MP3 files; ☐ full support for Bluetooth headsets. Limitations: ☐ Unregistered version is fully functional, the full playback time is limited to 10 minutes. Get the latest album from your favorite artist or create a personal playlist and take it with you. Play your own MP3 music from your personal device or from a USB stick or SD card. Manage your music collection from a NAS or other device connected to your computer. Easy to use, browse and play any music file on your device. Can be installed from the Symbian Appworld. Can be synced with the Yaesu VHF mobile radio (YVR-200, YVR-210, YVR-500, YVR-510) to list to radio stations. Work on Symbian^3 and Symbian^3 mobile phones. Please don't hesitate to contact us for any issue you might have. Viking is the leading creator of apps for your smartphone. Get the latest games, applications, books, movies and music. Available on Symbian OS^3 and Symbian S60^5 devices. Get the latest album from your favorite artist or create a personal playlist and take it with you. Play your own MP3 music from your personal device or from a USB stick or SD card. Manage your music collection from a NAS or other device connected to your computer. Easy to use, browse and play any music file on your device. Can be installed from the Symbian Appworld. Can be synced with the Yaesu VHF mobile radio (YVR-200, YVR-210
