[Download](#)

Keylogger software. Keylogger, an advanced keylogger with HD and highly detailed report records; It hides into system tray and change its icon to your own choice, the report window shown when the application is running; The logs can be sent to your email address or to your FTP server; The program has a free version. Compatibility: Windows XP, Windows Vista, Windows 7, Windows 8, Windows 10, Windows Server, 2008, 2008 R2, 2012, 2012 R2. Publisher's description Keymemory Keylogger is a software developed by Intesetec. The license of this software is trial. The trial version of Keymemory Keylogger will run on Windows 10. The minimum system requirements are listed as follows: Windows 7/8/8.1/10 (Vista, 2000, XP), 64-bit processor, 1 GHz or faster and 1 GB or more of RAM. Please note that KLog is a commercial application. The evaluation version of the product does not support the sending reports to an email address. How to use When the download is complete, double-click on the install file to begin the installation wizard. Follow the prompts. Make sure that

---

all the fields marked as required are completed and then click on the I Agree button. You must accept the License Terms in order to install the trial version of the software. Exit the program and launch the setup.exe file to install Keymemory Keylogger. Follow the prompts. The email address, port, password, and SMTP settings should be defined during the installation. After setup, the software icon should appear in the system tray. Click on it and the application will open the configuration window, if it does not, it means that you have not set the email address and an email is not configured. In this case, launch the configuration window and enter the required information. You may use the hotkeys to execute the application via the configuration window. This enables you to access the configuration window from anywhere and access the log from there as well. You should know that the hotkeys require a valid Win+Q combination. Open the configuration window and click on the configuration button. The Send Logs window will open. The application can send reports to an FTP server or an email address. You can specify the interval in which you want to receive

Keymemory Keylogger Cracked Accounts is a bit special, as it sends all data to your email address and can also capture screenshots. With its help you can prove your domestic harmony!// This Source Code Form is subject to the terms of the Mozilla Public // License, v. 2.0.
