History AutoCAD was the first CAD application to run on desktop personal computers. Before AutoCAD, software programs existed that made use of the internal graphics controllers (IGCs) of personal computers. These were typically commercial programs used for engineering, drafting, and architectural work. These programs required personal computer users to purchase their own hardware (graphics card) in order to access them. The IGCs in personal computers were notoriously unreliable, and often used up a large portion of the personal computer's memory. AutoCAD was originally sold for \$600, only \$20 more than the hardware cost of a 286-based personal computer. The software itself was bundled with a graphics card and color monitor. AutoCAD was much less expensive than the then-typical \$2,000 graphics-heavy CAD programs. Development of AutoCAD started in November

1980 with a contract between Autodesk and Harvard University's Center for Computer Graphics and Modeling (CCGM) to develop a desktop application for the Apple II and later the IBM PC. Autodesk was originally known as Application Engineering Company, founded in 1975 by Don Blanchard and Douglas Reiff, and named for the initials of the founders' last names. Don Blanchard had previously worked on modeling software called CAD-Sketch, which appeared in 1975. The name Application Engineering Company was changed to Autodesk, which is pronounced "Auto-DECK-uh". Autodesk first introduced AutoCAD in December 1982 as a DOS-based application on the Apple IIc. This version of AutoCAD was limited to a simple 2-D drafting or technical drawing format and was sold for \$695. In 1983, Autodesk, Inc. acquired the company Application Engineering Company. Since the introduction of AutoCAD, the software has grown to include 3D and 2D models, animation, rendering, and a network-based application

architecture. Although AutoCAD has been updated over the years, the core functionality has remained the same. The first version of AutoCAD was on DOS, in the form of a 4K (4000 word) diskette, which could be used directly without the need for a monitor. The first version of AutoCAD to run on the IBM PC DOS was in 1987 (AutoCAD LT 1.0). The DOS version of AutoCAD LT did not run directly from the diskettes but was instead shipped on a large

DOCKET NO. 17-08 573) DATE)) On appeal from the Department of Veterans Affairs Regional Office in Nashville, Tennessee THE ISSUE Entitlement to an initial compensable rating for residuals of a rotator cuff tear, right upper extremity. REPRESENTATION Appellant represented by: Tennessee Department of Veterans Affairs ATTORNEY FOR THE BOARD M.G. Garrod, Associate Counsel INTRODUCTION The Veteran served on active duty from July 1994 to

May 2004. This matter comes to the Board of Veterans' Appeals (Board) on appeal from a March 2016 rating decision of the Department of Veterans Affairs (VA) Regional Office (RO) in Nashville, Tennessee, which granted the Veteran's claim for an initial compensable rating for residuals of a rotator cuff tear, right upper extremity, and assigned a noncompensable (0%) rating. In May 2017, the Board remanded the issue of entitlement to an initial compensable rating for residuals of a rotator cuff tear, right upper extremity, for additional development. The Board instructed the RO to request that the Veteran provide additional information concerning his claim for service connection for tinnitus. In February 2018, the Board remanded the issue of entitlement to an initial compensable rating for residuals of a rotator cuff tear, right upper extremity, for additional development. The Board instructed the RO to schedule the Veteran for an examination to
