## ModernNote Crack +

- A desktop application that is easy to use and supports basic writing features - The modern user interface provides clear and simple options for editing text body - Delivered in just one package - Linux support for Windows users - Slim and light on resources ModernNotepad is an all-in-one text editor, which is not as robust as you would expect, but provides a fast and simple way to write text documents. It does not have a lot of features, but when it works, it does so very well. Features of ModernNotepad Setting up and running The only real requirement is to install the.deb file that accompanies the application, and then double-clicking the executable will make the setup process and the job complete. Interface and UI The application is available in just one interface and has a very simple and minimalist design. When you open it you are presented with just two types of tabs that can be quickly brought to the foreground by clicking a button in the toolbar and then read. The first tab is labelled 'Text', which offers you all of the traditional functions of a text editor, including tab marks and undo/redo. The second tab, labelled 'Document', allows you to tweak the settings of your text file, as well as view a list of its contents. Conclusion The application is relatively new, but is an excellent text editor to use for writing simple text documents. It's missing a lot of features, but the few that it does have work well. ModernNotepad Description: - Totally modern - A simple and minimalist text editor, ideal for writing simple texts - An integrated spellchecker - Linux support for Windows users Cool Notepad++ is a full-featured, notepad-like,

## ModernNote Crack+ Serial Number Full Torrent [Mac/Win]

ModernNote is a software application which comes bundled with a spellchecker and provides Windows 8 users with a simple means of creating, editing and saving body texts. Smooth setup and easy-to-use environment The installation process is a piece of cake, as it does not offer to download any third-party products and it does not last longer than a few seconds. After you complete it, you are met with a minimal and clear-cut GUI, as it consists of a plain window and a few buttons which can be easily brought up or hidden. Although no help contents are incorporated, it comes clear that all types of users, including those with little or no previous experience with computers, can find their way around it with ease. Options to tweak and types of files to process ModernNote supports a spellchecker, so that you can avoid making mistakes while in a hurry. Moreover, it is possible to cut, copy and paste elements, undo actions, apply a bold, italic or underline formatting, change the font color with the help of a built-in drop-down menu and use a search function to easily look for a particular phrase. At import, this utility supports HTML, CSV, TXT, HTM and RTF file extensions, while at export you can use CS, PRMDF, PRTDF, HTML, CSS, RTF, TXT and CSV formats. No other notable options are provided by the developers. Performance and conclusion The amount of resources required in order to properly work with ModernNote is low at all times which means that you can run it alongside other tools without running into problems, be they demanding or not. The interface is user-friendly, the response time is good and we did not come by any hangs, errors or bugs in our tests. All in all, it proves to be a pretty efficient piece of software for writing body texts, yet we feel that it lacks a lot of options that other similar tools enclose. References A: It's not a text editor, it's a text processor, you probably want Corel Text Studio, or Dreamweaver. I think you're looking for something like this: Basically its a word processor with a spell checker built in. Just spend 5 minutes with it. It's like MS
