Bought this hoping to convert my DVD collection to my Zune. The problem is the software works only on an offline installation of Zune or Windows Media Player. So you have to download the software on your Zune and try to install it from there. If you can do that, it worked fine! If you don't have an offline copy, I had no luck getting it to work. I downloaded the software and it said I needed a connection to the Internet. So I clicked "try it online" and it said "no connection to the Internet". So I clicked "try it offline" and it would do nothing. I'm sure it's a copy protection problem, since most other software you can buy comes with an online version. And this one doesn't even say on the box that you need to install it online, so I think I'll stick with buying other software in the future. 2 of 2 people found this review
