How to Use Photoshop for Beginners The Photoshop interface is easy to navigate, and it becomes easier to navigate as you become more familiar with the various tools and features of the program. Photoshop offers many pre-built tools and features for common photo manipulation tasks. Most are easy to use, but the more advanced features are also easy to use once you've learned them. So learning how to use Photoshop for beginners is a bit like using a toolbox: Using a tool for a very specific purpose is easy; learning how to use multiple tools to do that one task is fun and useful. This article will cover the essentials, the tools you will use to create your own photos and illustrations. We will focus on the tools that enable you to do things like: Color Correction Tools: Most computer display screens and printers are not color-accurate; i.e. they don't correctly display and print colors. A photo in a computer's file format may be represented as a 4-byte value for each color component, like RGB, HSL, CMYK, etc. When you view a photo on a computer screen, the colors are converted into other colors based on the color profile (if it has one). This conversion into another color space can create unwanted color shifts that are not seen in print. In other words, if you see a photo on a computer screen, the colors will appear to be wrong. Usually, you have control over the colors on your monitor. You can view the RGB or HSL values and can use this information to tweak the colors if needed. Adjust the Brightness and Contrast: As you may have guessed, the brightness or lightness of a photo may be too bright or too dark. You can use the Levels tool to even out the exposure of a photo. The levels tool allows you to specify a region on your photo and make changes to the image based on that region. Be careful not to have too strong a contrast, as this can create a harsh look. Adjust the Saturation and Color: The saturation of a photo typically refers to the saturation of the color in that photo. Color saturation makes some photos appear more vibrant. For example
