Pancreatic pseudocysts can develop as a complication of acute or chronic pancreatitis, or pancreatic trauma. The optimal approach is determined by cyst size and the presence of coexistent abscess. Endoscopic drainage has been the standard treatment in the past, although external drainage with placement of a cyst-gastrostomy or cyst-jejunostomy is the current standard of care. The results of previous studies in which endoscopic drainage was performed are reviewed, and the indications for it are discussed.Q: How to pass contents of a field to another script? What's On Thursday, 29 November 2011 My son takes drum lessons and the teacher bought him a guitar. A few weeks ago, they played a song called "Nutshell" which included a line which I didn't quite get - the chorus was "I think I like your son, I think I like your son", which I assumed was "I think he likes your son". Like many American puns, it wasn't so easy, so I asked Google. "I think I like your son" turned up 9,270,000 results. "I think I like your son" turns up only 1,040,000 results. Despite being a former naval officer, I think I like your son. We would like to thank everyone for so kindly sharing their... Single-transistor type NAND flash memories include a write voltage of about 12 V or higher (12 V to 20 V, or 12 V to 16 V, or 12 V to 20 V) in writing, and in addition, since two or more pulses are required per cell, the total voltage of 16 V to 20 V or more is used. For this reason, a high voltage peripheral circuit (for example, an amplifier circuit) is necessary, and a voltage of 17 V or higher is required for one memory cell, so that a voltage of about 31 V is used in total (17 V for cells and 13 V for peripheral circuits). Therefore, an N-type well and a P-type well are formed in a P-type substrate or a P-type substrate; and an N-type diffusion layer and
