Let $Y = \{\emptyset, X\}$ with the discrete topology. Define the function $f: X \rightarrow Y$ as follows: $f(x) = \begin{cases} x, & \text{if } x \in \emptyset \\ \emptyset, & \text{if } x = \emptyset \end{cases}$. Then f is a continuous function, but not an open map. Is the set $Z = \{f(K) : K \text{ is compact and connected}\}$ a topological space? A: For any two distinct points $x \neq y$ in \mathbb{R} we have $f^{-1}(y) \cap f^{-1}(x) = \emptyset$. Hence, if K_1, K_2 are compact and connected, then $f(K_1) = f(K_2)$ implies $K_1 = K_2$. In particular, this holds for the compact connected subsets of the real numbers. The present invention relates to digital imaging systems, and more particularly, to a method and apparatus for controlling the operation of a digital imaging system, such as a digital camera, video camcorder or the like. Modern digital imaging systems are often controlled using a camera

The police officers had just returned to the street after a search of a house that had just been visited by two of the suspected terrorists, who were found with explosives. The two officers, both in their early 20s, were on routine patrol when the incident occurred. The suspected terrorists have been arrested and are in police custody, and the police have commenced a search for a third armed terrorist who fled the scene and may still be at large. The incident has been contained, the regional police chief said. Burgos is a town of nearly 60,000 inhabitants. Belperdite is a sparsely populated town. Preliminary reports indicate that there was some form of ideological provocation in the incident. The terrorist attack comes less than a month after an attack in the nearby city of Guadalajara, where five people were killed and several were wounded in a shooting attack on a railway station, in which three attackers and two accomplices were also arrested. The two attacks have led to a

radicalisation of violent extremism in Spain, and in particular the emergence of the so-called 'chaos' cell, also known as the 'coward cell' or 'dream cell', which is in fact a subset of the extreme right-wing underground. The 'chaos' cell is composed of small and isolated cells with a more extreme and radicalising ideology than that of ETA, as well as supporters of this ideology who are seeking to prove themselves in the eyes of other cells, often claiming to have carried out previous attacks. This group has repeatedly claimed to have committed various crimes, including several robberies and other violent actions, and therefore has considerable support, both on the right and the left, who claim that they have the right to
