TuneGet is a software application built specifically for helping you download music and videos from the Internet in only a few steps. The tool offers support for search operations for quickly detecting your favorite artists and lets you download an entire

album. Intuitive layout You are welcomed by a clean feature lineup that allows you to set up the dedicated parameters with minimal effort. The tool keeps track of all your searches and displays them in a dedicated panel, and lets you open the saving directory directly from the primary window. Search operations and filters You can search for your media files, filter the results by audio or video items, as well as carry out search operations inside of the results. The tool doesn't let you watch or listen to the media items but it gives you the possibility to view some information about each file, such as title, artist, album, year, genre, quality, duration, and size. The downloaded files are stored in a dedicated window and can be opened via your default media player. There is also support for an advanced search operation which lets you specify detailed information about the song, namely artist, title, album, and lyrics. Simple-to-configure options TuneGet enables you to select the target location, organize the downloaded files into subdirectories by artist and album, or artist, add music to your iTunes library, convert the video files to AVI file format or extract the audio streams and export them to MP3 file format, as well as set up proxy parameters. During our testing we have noticed that TuneGet carries out the downloading task pretty quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not hampered. It is also important to mention that the tool is able to quickly identify even not so well-known artists. An overall efficient downloader All in all, TuneGet comes packed with a decent suite of features for helping you download your favorite media files, and is suitable for rookies and professionals alike. `log('-') log('-') log('-') log('-') log('-') log('-') 09e8f5149f`
