Nulloy Audio Player is a free Windows application designed to play all audio files such as MP3, OGG, MP4, WAM, FLAC, APE, WAV, MPC, AAC, AIFF, M3U, MOD and OPUS. The software is equipped with various options to optimize performance and increase its ease of use, such as showing/hiding window, repeating songs, toggling window visibility and customizing hotkeys. You can set up an easy and fast way of downloading and saving files of a specific type to the hard drive, as well as enable or disable covert art, set a volume, shuffle and repeat files and define a playlist. All this can be done in the order in which you wish, and you can set up your preferences in the main window. You can also view a waveform on each song, as well as sort files by name, date, artist or title. If you wish, you can provide a description for each file by adding them to the preferences. The software offers a very user-friendly interface which we found to be very pleasant to use. We also like that you can access the playlist directly from a floppy disk, which can be useful if you don't have an active internet connection. When all is said and done, Nulloy Audio Player is a simple, yet efficient tool for playing your audio files.
