**ASoft Office Version Detector Free License Key For PC**

Simple interface and straightforward functionality Not only is the

---

installation quick and uneventful, but you can retrieve the desired information by simply launching the application. On a side note, it goes without saying that you require to have the Microsoft Office pack installed on your computer for the program to work. As far as the functionality is concerned, it can be summarized to launching the application. The detected versions of the Office components are displayed automatically exhibited in a medium-sized and clean window. Unfortunately, the program does everything automatically and all it allows you to do is preview the data. It would be helpful if the application came with a function that enables you to access Microsoft's website to check out the latest versions quickly. Includes a handy export function It is worth mentioning that the program comes with an export feature that enables you to save the information to an XML output file. Moreover, you can run the data via the command line function. Consequentially, you can be sure to disseminate the data quickly whenever you need it. While some users could argue that you can get the same information the classic way, the truth is that sometimes retrieving this data can be complicated and requires the creation of a script. In addition, since this script can provide more information than necessary, you might also have to modify it so that it offers info only about Microsoft Office. A fast and reliable tool to learn the Office version In the eventuality you are working on a project that entails using certain Word or Excel functions and you are unsure about the versions you have installed on

---

your computer, then ASoft Office Version Detector can prove useful. Ease of installation: Ease of operation: Overall: Overall: Review by Jack on Sunday, June 12, 2015 I downloaded this software as it was on the list of the programs which I could possibly re-install. I used it on two other laptops previously, which failed the initial test. I was amazed at the speed at which the software was able to identify the latest version of the Office installations and the rest of the programs installed. This is of great use to me as I move from one computer to another, as I don't need to go through installing the program manually. I would recommend it to anyone. Definitely is worth the \$20 Ease of installation: Ease of operation: Overall: Overall: Review by Juan on Friday, April 25 09e8f5149f
