Plenty of options, neat interface The most important and impressive aspect is that the program itself, although filled with features, offers an intuitive interface with accessible features and clear labels. You can't miss any function due to not finding or identifying it. On the contrary, you'll find things in areas you expect most. Start by analyzing your folder, files, or drives. The process is swift. You can create all sorts of charts explaining how your space is being used and by what exactly. All created reports can be exported, if need be, to formats such as XML, HTML, and CSV. Other formats are supported too. Search, create tops and databases The application's usefulness doesn't stop here. You can search for any particular file on your analyzed disk for fast detection. Create various tops to understand what files are the largest in your scanned space. Check network storage systems for the same reasons. You can also classify files depending on their features and have them arranged for easier analysis. The interface is divided efficiently with various accessible paths on the left, and the contents of these paths to storage spaces are depicted on the right. In terms of understanding how space is filled on your storage devices, this program can indeed wear the Ultimate badge for sure. Disk Savvy Ultimate is an application that will help any user better understand how storage space is divided amongst the files that occupy it. Functions are clearly labeled and accessible, and the analysis process is swift and efficient. I want to develop a.NET Core console application that needs to access an existing.dll I have downloaded and added the necessary libraries to my project. Now, if I try to use any type from that library (also I've made sure that the.dll is in the bin\debug folder), I get the following error: {"Could not load file or assembly 'References\Microsoft.SharePoint.Client, Version=15.0.0.0, Culture=neutral, PublicKeyToken=71e9bce111e9429c' or one of its dependencies. The located assembly's manifest definition does not match the assembly reference. (Exception from HRESULT: 0x80131040)"} What is more strange, is that if I copy and paste the "Microsoft.SharePoint.Client" from my bin\debug folder to my bin\release folder, it works. I'm using Visual Studio 2019,.NET Core 3.1 and my project type is Console Application. A: What is more strange, is that if I copy and paste
