## What's New In?

Extend the markups from 2D to 3D: Add perspective to markups, be they 2D or 3D. You can now apply perspective to markups, even when they're in 3D. (video: 1:05 min.) More Markups in 3D: Edit your text directly inside your 3D model. Edit a single text string, like your company name, and see it change instantly in the 3D model. (video: 2:50 min.) More Precision in 3D: Reduce repetitive setup time with improved pressure sensitive 3D editing capabilities. Rotate your workpieces with less effort and less chance of errors, thanks to the new ability to rotate in place. (video: 2:08 min.) More Integration with Other Apps: Integrate your AutoCAD drawing and model with other applications by bringing in a design and model from your other applications. Work more efficiently with real-time synchronized collaboration. Your drawings and models can be edited by multiple users simultaneously, so you can collaborate on a shared drawing that's updated in real time. The synchronization is so close to real-time that your drawings can be updated as soon as someone else makes a change. (video: 1:47 min.) With the new Update 2D and Update 3D command, you can easily get AutoCAD to find and install updates and install them automatically. You can export 3D models directly from View and Model window into DXF, which means you can easily share your 3D drawings with other CAD software, without having to export them into other formats. You can also share your drawing with SketchUp by converting it to a 3D SketchUp model. (video: 1:33 min.) You can now bring in sketches, drawings, and models from your other apps, or you can use the new Insert from CAD command to import a drawing, model, or presentation into your drawing. (video: 2:47 min.) Drawing Window Enhancements: Get better precision by using the new 3D modeling tool to customize your drawing. The 3D modeling tool provides precise control and feedback, so you can get the best drawing every time. (video: 1:42 min.) Get a better view of your drawing by opening your drawing in a new window, and closing your old window. You can now open and close multiple drawings
